

49 Goldhawk Road, Shepherds Bush, London W12

This is a period property constructed on the turn of the last century, having been converted to provide eight flats, located on the first, second and third floors with a loft conversion. The residential conversion was only partly completed by the previous contractor, so the challenge was to estimate what the remaining works to complete the M&E and Building Works.

We instructed Richard Abbott, from Pope M&E Services to provide a detailed report of the outstanding services installation. A Schedule of Works for outstanding M&E and Building Works was provided and put out to tender.

Incomplete Services Installation

Incomplete Building Works

New Kitchen pending completion

New Bathroom pending completion
